

# BOBCAT GENUINE UNDERCARRIAGE PARTS

Take advantage of factory-proven durability with an exceptional quality ride.  
Ensure perfect design compatibility between rubber tracks, idlers, rollers  
and sprockets by using genuine Bobcat undercarriage parts.

# BOBCAT GENUINE UNDERCARRIAGE PARTS

Bobcat genuine undercarriage parts are designed specifically for Bobcat machines according to our OEM specifications. Take advantage of factory-proven durability with an exceptional quality ride. Ensure perfect design compatibility between rubber tracks, idlers, rollers and sprockets by using genuine Bobcat undercarriage parts.

## ► DURABLE COMPONENTS

Tough forged steel rollers and idlers provide a smooth ride without using weak plastics or rubber, meaning the machine is less prone to downtime and will require less maintenance.

Sprockets are manufactured with forged steel with a hardness rating of HT-5 – the highest rating of all standards in Bobcat for hardness, tensile, impact, casting, and surface.

## ► EASY TRACK CARRIAGE CLEANOUT

A horizontally mounted tension cylinder creates more room between the undercarriage and track for easier cleanout. The undercarriage is sloped on both sides of the tracks to easily shed material such as sand, dirt, mud and debris throughout the day. Raised cutouts between the rollers also make cleaning easier.

## ► COMFORTABLE RIDE

Front idlers that ride on the rubber track's roller way along with wider rollers help reduce vibration to improve operator comfort and decrease track wear to help extend the track's life. The optional Torsion Suspension system incorporates dual-flange front idlers and wider rollers for smooth action, combining the comfort of roller suspension and stability of a solid mount undercarriage.

## ► ENHANCED DE-TRACKING PROTECTION

Consistent track tension associated with single-flange rear idlers help minimize the chance of loosening and de-tracking in tough working conditions.

- ▶ GREAT WEAR RESISTANCE AND DURABILITY
- ▶ CONSISTENT PRODUCT QUALITY & RELIABILITY
- ▶ EXCELLENT SURFACE AND CORE HARDNESS PROVIDE LONGER WEAR LIFE, LOWERING COST PER HOUR
